

Q1 The Ministry of Natural Resources has asked if the Upper Rideau Lake community would like the lake stocked with walleye. For this to be successful the population of bass and other species would have to be reduced to a lower level by increasing the commercial fishing quotas and encouraging sport fishing of other species to maintain a competitive population of walleye. Do you want the lake stocked with walleye?

1	No, not at the moment. I think the organization does a good job.	10/9/2018 6:05 PM

2	no	9/25/2018 5:35 AM
3	I would like to see the lake association take a leadership role in tracking new development on the shorelines. Just on our side of the lake we seem to have several new private boat launches that people have put in, as well as a huge boat house and a big new house that is well within the 100m set back. Also, there is a proposed new property to be severed off that has less than the required shoreline frontage. This all leads to increased run-off into the lake and densification.	9/24/2018 6:15 AM
4	I think that URLA is doing a good job.	9/20/2018 8:32 AM

7	Re. the walleye issue - I don't have enough information. It seems more complicated than yes/no. Without info. I voted NO.	9/18/2018 2:21 PM
8	More information on water quality, help mark hidden shoals etc. I think the lake is too big to try to create an "URLA" community, apart from shared interests like these.	9/18/2018 11:35 AM

26	The URLA needs to do a better job addressing the amount of cut weeds in the lake this year. It was unacceptable the amount of cut weeds in the lake this year. It was pretty obvious these were cut and left to float when Westport harbour was serviced.	9/13/2018 6:30 AM

41	there is a serious weed problem on the upper Rideau from the harbour to the other end, in Westport. It is so bad, that we had to take our docks and boats out because you can't get through the weeds. I pay almost \$5k in taxes and it makes me ill looking at the thick and smelly mass of floating weeds from one end to the other and about 75 feet out from the water's edge. Where did they come from? The weeds that naturally grow in our waterfront are still there so they did not come from our water front properties. The residents want answers.	9/11/2018 11:52 AM
42	Put pressure on Westport to fix up the quality of their harbour. Better and more docks, fix erosion and docks on west side of island.	9/11/2018 11:50 AM
43	I wish I had ideas on how to increase membership, but I don't.	9/11/2018 11:35 AM
44	no	9/11/2018 11:28 AM
45	I'm very concerned about the impact of increasing wave action on shoreline erosion. The new boat rentals out of Smiths Falls have increased large waves generated from their wake. Algal blooms are a major concern. stabilizing of vulnerable shorelines is a project that should be discussed to avoid the inevitable degradation of water quality, for swimming and other enjoyment and recreation. Can speeds be reduced? Can boat users be educated on their impacts as they pass through the locks? A simple info hand out and survey while waiting in the locks can be easily done. Monitoring the results also easy. Just some practical ideas to maintain the current water quality and possibly enhance and sustain it.	9/11/2018 11:02 AM
